

Date Submitted: _____
Permit Number: _____
Date Issued: _____

2006-2007 HOLIDAY LIGHTING CONTRACT/PERMIT

Holiday lights may be placed across city property, streets and right-of-ways upon the issuance of a free permit from the city administrator. Residents requesting permits must agree to the following conditions:

- All lights will be placed in compliance with the National Electrical Safety Code of sixteen (16) feet above all roads, streets or areas subject to traffic—pedestrian or vehicular—and fourteen and one-half (14.5) feet above water.
- All electrical cords will be double-taped together and plugs and outlets will be taped together.
- All lights, wire and string will be completely removed by January 15, 2007. It is important to remove strings and wires tied around trees as they will girdle the tree, cutting off energy needed for growth.
- The responsible party must be able to be reached 24 hours a day in case of problems with the line.

Street Address: _____

Owner of Property: _____

General description of where lights will originate and end: _____

I have read and understood the above conditions and agree to abide by these terms.
